

To: Public Water and Wastewater Officials (TANS list)

Title: Threat Advisory Notification System [TANS] Notice # 64

Purpose: To Announce Water Sector ICS/NRF Training Workshop at MDEQ on September 18, 2012.

Distribution: Unlimited

1. This one-day ICS and NRF training workshop is sponsored by the EPA Water Security Division and will help water and wastewater utilities to operate more efficiently and effectively during an incident or event utilizing the ICS. The training is also being offered to help utilities to understand the purpose of the NRF and the US EPA's role within the NRF in support of Emergency Support Function (ESF) #3, Public Works and Engineering. The specific courses offered as part of this workshop are:
  - a. IS-200.b – ICS for Single Resources and Initial Action Incidents, and, IS-800.B – National Response Framework, An Introduction
2. The attachment is the Michigan Workshop flyer with workshop registration and other details.
3. Also attached is a map of the MDEQ location for the workshop.
